

UI Design Template

Week 3

Template for Creating a new event :

The image shows a web application interface for creating a new event. The interface is titled "Real Office" and includes a sidebar with navigation options: "Scheduled Events", "New Event", "Modify Event", "Cancel Event", "Notifications", and "Settings". The main content area is titled "Create Event" and contains several input fields: "Event Name", "Event Venue", "Event Time", and "Capacity" (a dropdown menu). Below these fields is a section titled "Special Requirements" with three checkboxes: "Projector needed", "A/C needed", and "Refreshments required". A blue "Schedule" button is located at the bottom right of the form.

A/C needed

Refreshments required

Schedule

This page takes all the input required to schedule an event and passes it to the backend. The backend performs the required checks and schedules the event. The confirmation is then displayed on this page.

Template for viewing all events :

This page takes the required date as an input and lists all the events scheduled on this date in a table format. The elements of the table are clickable and lead to the 'Modify Event' page with the event details already filled in.
